PROFESSIONAL SUMMARY

Fullstack Web Developer with expertise in **React, Node.js, PHP, and modern frameworks**. Skilled in designing responsive, scalable applications that align with business needs. Proven experience delivering impactful digital solutions, optimizing user experience, and collaborating across teams to achieve results.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, PHP, Laravel, CodeIgniter
Databases: MongoDB, MySQL, Oracle
Tools: Git/GitHub, Postman, REST APIs, Vercel, Netlify
Core Strengths: Responsive design, scalable architecture, cross-functional collaboration

---

SELECTED PROJECTS

Developer Portfolio Website – Dual-view (Developer & Client) with role-based access, project galleries, and tech stack highlights. *(React, Node.js)*

World Country App – Integrated external APIs for global country data with search, filters, and responsive UI. *(React, REST API)*

Space Tourism App – Interactive React app simulating space travel experiences with destinations, crew, and technologies. *(React)*

Business Dashboard (Demo) – Sales & KPI monitoring dashboard with API integration for real-time visualization. *(React, Node.js)*

WORK EXPERIENCE

Backend Engineer — SapphireCredit *(Sep 2025 – Present)*

- Developed and maintained **Laravel-based backend systems** integrating **Remita APIs** for loan mandates and repayments.

- Automated financial workflows, improving processing accuracy and reducing manual intervention.

- Optimized **MySQL databases** for performance and reliability.

- Managed background jobs and queues for high-volume transaction processing.

- Ensured secure, efficient communication between **Vue.js frontend** and backend services.

Web Developer — Ntech Information System

- Built internal tools with **PHP & CodeIgniter**, reducing manual processes by X%.

- Delivered mobile-first UIs with **Bootstrap**, improving accessibility across devices.

- Trained staff on **JavaScript, HTML/CSS, and CodeIgniter**, boosting team productivity.

- Optimized peer code for scalability, reducing load times by X%.

EDUCATION

BSc, Business Education — Tai Solarin University of Education (2023)
Diploma, Software Development — JOBITECH (2014)

CERTIFICATIONS

Fullstack Web Development — Tech Studio
