PROFESSIONAL SUMMARY

Backend & Full-Stack Developer with 5+ years of experience building secure, scalable, and high-performance applications across fintech, e-commerce, and on-demand marketplace platforms. Specialized in REST API design, payment and financial systems integration, and data modeling with Node.js, NestJS, Laravel, and PostgreSQL, backed by solid frontend skills in React and Next.js. A BSc in Business Education gives me a unique edge in translating business requirements into reliable technical solutions.

TECHNICAL SKILLS

Backend	Node.js, Express.js, NestJS, PHP, Laravel, CodeIgniter
Databases	PostgreSQL, MySQL, MongoDB, Redis, Prisma
Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Styled Components
APIs & Tools	REST APIs, Git/GitHub, Postman, Vercel, Netlify, Webhook Integration
Specialties	Authentication & Authorization, Financial Systems, Payment Gateways (Remita, Paystack), KYC/AML, Real-time Matching, Background Jobs & Queues

WORK EXPERIENCE

Backend Developer — AnyWorky	Apr 2026 – Present
- Building backend infrastructure for an on-demand local services marketplace connecting customers with verified service providers through real-time availability, matching, and request management. - Designed and built REST APIs for customer, provider, and service workflows. - Developed backend logic for real-time provider availability and job matching. - Implemented authentication, authorization, and secure user account management. - Modeled and managed marketplace data for users, providers, categories, requests, and bookings. - Built backend services with a strong focus on reliability, scalability, and maintainability.	
Backend Developer — Gloubal Inc.	Dec 2025 – Feb 2026
- Designed and maintained secure REST APIs handling payments, transfers, withdrawals, and account management with robust authentication and authorization controls. - Implemented business and financial logic covering transactions, fees, VAT, balance validation, and spending limits to ensure accurate, consistent financial calculations. - Protected sensitive financial data through encryption, access controls, and secure storage in compliance with regulatory standards. - Designed efficient database schemas, managed transactions, and implemented safeguards against double-spending. - Integrated third-party financial services including payment gateways, banking APIs, KYC/AML services, and notification systems with proper failure handling and webhook security.	

- Developed and maintained Laravel-based backend systems integrating Remita APIs for digital loan mandates and automated repayment cycles.
- Automated financial workflows, reducing manual intervention and improving processing accuracy.
- Optimized MySQL database performance and reliability for high-volume transaction processing.
- Managed background jobs and queues for large-scale financial operations.
- Ensured secure, efficient communication between Vue.js frontend and backend services.

Web Developer — Ntech Information System

2015 – 2017

- Developed internal business tools using CodeIgniter and PHP, improving operational efficiency.
- Delivered mobile-first, responsive UIs using Bootstrap across multiple client projects.
- Led training sessions for junior developers on CodeIgniter, JavaScript, and HTML/CSS.
- Reviewed and optimized peer code for scalability, performance, and best practices.

KEY PROJECTS

- **AnyWorky – On-Demand Services Marketplace:** Designed scalable backend APIs and database models powering provider onboarding, job matching, real-time availability tracking, customer requests, and marketplace operations. Stack: Node.js, NestJS, PostgreSQL.
- **TMK Residence – Shortlet Booking Platform:** Built a full-stack booking platform for a luxury shortlet apartment business in Abuja, with availability search, a multi-step booking flow with ID verification and Paystack payments, and an admin dashboard for listings, bookings, occupancy, guests, and revenue. Stack: Next.js, TypeScript, NestJS, PostgreSQL, Prisma, Redis, BullMQ. tmkresidence.com
- **Fintech Backend Platform – Gloubal Inc.:** Designed and maintained secure REST APIs for a financial platform handling payments, transfers, withdrawals, and account management. Integrated payment gateways, banking APIs, KYC/AML, and webhooks. Stack: Node.js, Express.js, PostgreSQL.
- **Loan Application Backend:** Scalable Laravel REST API integrated with Remita for end-to-end management of digital loan mandates and automated repayment cycles.
- **ShopWave – Multivendor E-Commerce Platform:** Full-stack marketplace built with NestJS and Next.js. Features vendor onboarding, product management, order processing, and payment integration.
- **Church Finance Management System:** Built a full-stack income and expenditure tracking platform for a religious organization, enabling real-time financial reporting, transaction logging, and budget monitoring. Stack: PHP, JavaScript, AJAX, MySQL.
- **Admin Dashboard – Tidoy Booking App:** Full-stack property management dashboard handling hotels, apartments, and villas. Stack: React, Tailwind CSS, Node.js, Express, MongoDB, Cloudinary.

EDUCATION & CERTIFICATIONS

BSc, Business Education — Tai Solarin University of Education | 2018 – 2022**NYSC** — National Youth Service Corps | 2023 – 2024**Diploma in Software Development** — JOBITECH | 2012 – 2014**Full-Stack Web Development Certificate** — Tech Studio | 2025
